All the files needed for this unit are in this folder. The first document you should look at is

Unit 7 Teaching Guide with Answers.docx

This free unit carefully considered how sensors, microprocessors and actuators are used to create automated systems. The advantages and disadvantages of automated systems in respect to various scenarios such as transport, weather and gaming are covered. The second lesson considers robotic technologies including industrial and domestic robots and drones. Finally, artificial intelligence is studied including expert systems and machine learning. A final assessment covers all the topics covered in this unit.

You may wish to copy the files from the unit onto a secure shared network drive or VLE where students can access the presentations, worksheets, homeworks and links. Remember to remove any documents you would prefer them not to access such as the assessment and answer sheets.

You may also wish to upload the files for secure home access. This could be via an MLE such as Fronter, Frog, SharePoint or Moodle.

If you have any difficulty opening any of the files, which were all created in Office 365, or experience any other problems, please email support@pgonline.co.uk.

This is the seventh in a series of 10 units for Cambridge IGCSE and O Level 0478/0984 Computer Science. We hope you will find it useful.

We would greatly appreciate your feedback once you have had a chance to use the material. Please send an email to support@pgonline.co.uk.
